

Disney Genie+

Disney Genie + Lightning Lane

When you take your day to the next level by purchasing Disney Genie+ service, you can select arrival windows for Lightning Lane {previously Fastpass Plus} entrances that are available at more than 40 attractions and entertainment options across all 4 theme parks, one at a time throughout the day.

Disney Genie+ service is available for a range of \$15-\$22 PER GUEST, per ticketed day. This is added day by day, while you are in the theme parks. ***It cannot be added to your tickets ahead of time.***

Individual Lightning Lane Selection (ILLS)

Some of the most highly demanded attractions will offer Individual Lightning Lane entry as an "à la carte" purchase. This option will be available for all Guests—with or without Disney Genie+ service—and lets you choose a time to arrive at up to 2 attractions each day (booked one at a time).

Pricing and availability will vary by date, attraction, and park. Be sure to check the My Disney Experience app on the day of your visit for current prices and attraction availability. Currently, the price ranges from \$7-\$15 per person, per attraction.

Attractions Included with Each Option: {this is current, and Disney may add or subtract from this. I will keep you updated}

Please note: In the chart above, Disney can sometimes move attractions from blue to purple, and vice versa. For example, with the opening of Guardians of the Galaxy, Remy's Ratatouille Adventure

was moved to the purple tier for summer travel, as was FROZEN Ever After. If you have questions about which attractions are the blue tier during your time frame, please feel free to ask!

How Do I Add Disney Genie+ to My Park Tickets?

You are able to add Disney Genie+ as early as midnight on the day you want to use it, through the My Disney Experience app on your smartphone. **Tip:** I add mine around 6:55AM. I do not stay up until midnight to add it.

How Do I Purchase Individual Attraction Selections?

The Individual Attraction Selections will be available to you to purchase through your My Disney Experience app on the day of use.

How Do I Use Disney Genie+ in the Parks?

- You can choose your first attraction at 7:00 am, even before you enter the parks! You will go into your My Disney Experience app and choose your first attraction, based on the park you have reservations for that day. The app will give you a return time to go to that attraction. You will have an hour window to enter the queue for the attraction.
- After you've used your first selection you can make another selection for your next attraction immediately, or you may need to wait or you may need to wait until the next selection window time opens. and so on. Disney Genie+ selections are typically able to be made every 120 minutes from the regular park opening time. For example, if the park opens at 9AM, the second selection can be made at 11AM.
- You may only select listed attractions once a day with Disney Genie+. If you'd like to ride that attraction again you must wait in the standby line. (or vice versa, if you arrive and there's a low queue, wait in the standby line first and THEN use your Disney Genie+ Lightning Lane access later in the day.)
- If you're selecting a very popular attraction, you may get a return time that is later in the day. If that is the case, the app will tell you when you can make another selection, before using the first one.

If you need a visual, I HIGHLY recommend watching this [Disney GeniePlus Video](#).

How Do I Use the Individual Attraction Selection in the Parks?

Onsite Walt Disney World Resort guests can make their first Individual Attraction purchase at 7:00 am.

Guests staying at other resorts will be able to make their first purchase when the park opens.

Remember that you can only purchase this for up to 2 available attractions per day, even if you are park hopping, so make your choices wisely!

How Should I Maximize Disney Genie+ During My Trip?

- Book your first Genie+ Lightning Lane slot for 2 hours after park opening, or later.
- Plan on "rope dropping" the park to use the standby lines when they are shortest.
